Celestron Astromaster 130EQ Riflettore 33x Nero, Blu, Grigio:

Strumento riflettore Newton a tubo corto montato su una montatura equatoriale e su un solido treppiede in acciaio. La montatura equatoriale è comoda per inseguire gli oggetti celesti anche quando si osserva ad alti ingrandimenti usando una sola manopola micrometrica.

Il diametro di 130 mm permette inoltre di osservare centinaia di crateri lunari, le fasi di Venere, i chiaroscuri sulle superficie di Marte, i satelliti e le fasce nuvolose di Giove, gli anelli di Saturno. Inoltre permette di separare le componenti di molte stelle doppie e, nelle notti migliori, di osservare molti ammassi stellari e nebulose.
