

# Catalogo 2013

**I** Gimi si riserva il diritto, ferme restando le caratteristiche essenziali dei modelli qui descritti e utilizzati, di apportare agli stessi le eventuali modifiche di dettagli, accessori o colori che ritenesse opportune, a scopo di miglioramento o per qualsiasi esigenza di carattere costruttivo o commerciale.

**GB** Gimi reserves the right to modify for commercial-technical reasons any item in this catalogue.

**D** Der Hersteller, Gimi, behält sich Änderungen in technik, Ausführung und Ausstattung vor.

**F** Photos non contractuelles, Gimi se réservant la possibilité d'apporter des améliorations ou des modifications par rapport aux modèles photographiés.

**E** Gimi, se reserva el derecho de aportar a los modelos aqui descritos e ilustrados, eventuales modificaciones en los detalles, accesorios y colores, con la única finalidad de mejorar por cualquier exigencia de caracter constructivo o comercial.

# Gimi. Questione di leadership.

Gimi sa cosa vuol dire essere leader di settore. Significa avere una conoscenza approfondita dei mercati e dei segmenti in cui si opera con successo da molto tempo; significa fare investimenti sulla via dell'innovazione per tracciare nuovi percorsi, consapevoli che altri seguiranno; significa porsi perennemente in ascolto, perché le tendenze quando sono evidenti non sono più tali. Significa soprattutto essere coerenti con le proprie linee guida, che in Gimi pongono sempre **il consumatore al centro**: rispetto dell'ambiente, qualità, innovazione, servizio, passione per il proprio lavoro e capacità di continuare a migliorare le proprie prestazioni. Perché la leadership si conferma ogni giorno.

## **Gimi. Question de leadership.**

Gimi sait ce que signifie être leader d'un domaine d'activité: avoir une connaissance approfondie des marchés et des segments où l'on opère avec succès depuis longtemps; faire des investissements visant à l'innovation afin de tracer de nouveaux parcours que d'autres suivront; être toujours à l'écoute car les tendances évidentes ne sont plus des tendances. Mais surtout faire preuve de cohérence avec ses propres lignes directrices qui chez Gimi sont toujours **axées sur le consommateur**: respect de l'environnement, qualité, innovation, service, passion pour le travail et capacité de poursuivre l'amélioration des performances. Le leadership se confirme au jour le jour.

## **Gimi. It's a matter of leadership.**

Gimi knows what leadership means in any field of activity. It means deeply knowing markets and segments where we have been successful for many years; it means making investments in innovation in order to open new paths that will be followed by others; it means constant listening because visible trends are no longer trends. But most of all it means being consistent with corporate guidelines, which for Gimi are always **based on the consumer**: respect for the environment, quality, innovation, service, passion for work and constant improvement of performances. Because leadership can only be reaffirmed on a daily basis.

## **Gimi: Una cuestión de liderazgo.**

Gimi sabe qué significa ser líder del sector. Significa un profundo conocimiento de los mercados y segmentos en los que trabaja con éxito desde hace mucho tiempo; significa invertir en innovación para marcar nuevos rumbos, conscientes de que otros los seguirán; significa una constante actitud receptiva, porque las tendencias dejan de ser nuevas cuando ya son evidentes. Significa sobre todo ser coherentes con las propias directrices, que en el caso de Gimi ponen **al consumidor en el centro**: tutela del medio ambiente, calidad, innovación, servicio, pasión por el propio trabajo y capacidad de seguir perfeccionando las prestaciones. Porque el liderazgo se conquista cada día.

## **Gimi. Eine Frage der Marktführung.**

Gimi weiß was es heißt, Marktführer auf dem Gebiet zu sein. Ein marktführendes Unternehmen kennt den Markt und die Branche genau, in denen es seit langem erfolgreich tätig ist. Es investiert in Innovation, um neue Wege einzuschlagen, auf denen sicher bald andere folgenden werden. Es ist ständig bemüht, den Bedürfnissen nachzukommen, weil eine Tendenz bereits veraltet ist, sobald sie sichtbar wird. Es bedeutet aber insbesondere, kohärent nach den eigenen Prinzipien zu handeln, in deren **Mittelpunkt bei Gimi der Kunde steht**: Umweltschutz, Qualität, Innovation, Service, Leidenschaft für den eigenen Beruf und ständige Verbesserung der eigenen Leistungen. Denn ein marktführendes Unternehmen muss sich tagtäglich beweisen.

## **Gimi: Вопрос лидерства.**

Компания Gimi знает, что значит быть лидером в своей области. Это означает глубокое знание рынков и сегментов, в которых она работает в течение уже многих лет; это означает инвестиции в инновации для разработки новых направлений, будучи уверенной в том, что ее примеру последуют другие компании; это означает постоянное умение слушать, поскольку тенденции, становящиеся явными, перестают быть таковыми. Но, прежде всего, это означает верность своим руководящим принципам, в центр которых Gimi неизменно ставит потребителя: это охрана окружающей среды, качество, инновации, сервис, страстная любовь к собственному делу и способность постоянно совершенствовать свою эффективность. Потому что лидерство необходимо подтверждать изо дня в день.

# Ecceellenza certificata. Qualità Gimi.

## Certified Excellence.

## Gimi's Quality.

La costante ricerca di processi produttivi d'avanguardia consente a Gimi di porsi al vertice della categoria sia per quanto riguarda le caratteristiche finali di prodotto, esente da qualsiasi tipo d'imperfezione, sia per le metodologie di lavorazione che rispettano salute e ambiente.

Constant research into innovative production processes helps Gimi stay at the top of its category, with reference to both the final characteristics of its products, which are free of any flaws, and its health- and environmentfriendly manufacturing methods.

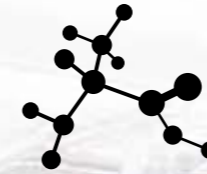

### Innovazione e design

Gimi investe in ricerca sia per individuare i bisogni insoddisfatti del consumatore, sia per sviluppare prodotti innovativi. Brevetti esclusivi di vario tipo testimoniano questo impegno, tutelando la creatività dei nostri progettisti e il tratto estetico dei nostri designer.

### Innovation and Design

Gimi makes investments in research in order to identify unsatisfied needs and develop innovative products. This commitment is proven by many unique patents that protect the creativity of our designers and their aesthetical value.

### Qualità dei materiali

Gimi sceglie i materiali più affidabili e performanti, come ad esempio l'acciaio, l'alluminio anodizzato, i polimeri plastici carichi e non, tutti materiali riciclabili al 100%.

### Quality of Materials

Gimi chooses the most performing and reliable materials such as steel, anodised aluminium, charged and uncharged plastic polymers, all these materials are 100% recyclable.

Le materie prime, i semilavorati, i componenti, nonché i prodotti finiti sono sottoposti a test di conformità secondo le metodologie più rigorose.

Raw materials, semi-finished products, components and finished products must successfully pass compliance tests performed according to the strictest methodologies.

### Tecnologie produttive

Gimi eccelle per la modernità e l'unicità del suo sistema produttivo altamente automatizzato, garanzia di ripetibilità dello standard qualitativo: dal "doppio bloccaggio" dei fili in alluminio agli snodi di chiusura senza rivetti, dal doppio rivestimento antiruggine (elettrozincatura e rivestimento a polveri epossidiche) alla tecnologia al nitrogeno che inietta il polimero insieme ad un soffio di azoto, esempi di eccellenza tecnologica che si traduce in evidenti vantaggi per il consumatore.

### Manufacturing Technologies

Gimi sets an example of excellence in terms of modernity and uniqueness of its highly automated manufacturing system, which is a guarantee of repeatability of its quality standards. "Double blocked" aluminium lines, unriveted hinges, double antirust covering (electro galvanising and epoxy powder covering), nitrogen technology (whereby polymers are injected with a puff of nitrogen): these are all examples of technological excellence that turns into concrete advantages for consumers.

### Rispetto dell'ambiente

I materiali, i processi produttivi, i prodotti sono compatibili con il rispetto dell'ambiente.

### Respect for the Environment

Materials, manufacturing processes and products are all environmentally friendly. For Gimi, the UNI EN ISO 14001 certification is a goal achieved a long time ago. Now the company is increasingly autonomous from the point of view of energy provision thanks to its modern cogeneration plants.

La certificazione UNI EN ISO 14001 è per Gimi un traguardo raggiunto da tempo, cui si aggiunge la crescente autonomia energetica basata su moderni impianti di cogenerazione.

### Sicurezza

La sicurezza delle persone è un tema importante per Gimi, sia che lavorino presso i nostri impianti sia che utilizzino i nostri prodotti. Questi ultimi a partire dalla loro progettazione rispondono alle più severe normative internazionali di riferimento.

### Safety

The safety of people is a very important issue for Gimi with reference to both its staff and users of its products, which from as early as their design stage comply with the strictest international reference standards.

### Servizio al cliente

Gimi lavora ogni giorno in quest'ottica attraverso una relazione di reciproco scambio basata su valori come affidabilità, velocità, puntualità, flessibilità. La soddisfazione del cliente è un obiettivo quotidiano al quale concorrono tutte le funzioni aziendali, ciascuna nel suo ambito.

### Service to Customers

Gimi works every day in this spirit through mutual exchanges based on values such as reliability, responsiveness, timeliness, and flexibility. The satisfaction of customers is a goal to be achieved on a daily basis with the cooperation of all corporate functions, each of them in its field of competence.

# Nitrogen technology

## Tecnologia evoluta per l'uso quotidiano.

La resina plastica è la materia prima che ha rivoluzionato la produzione industriale degli ultimi 60 anni, abbassando il costo degli oggetti di uso comune, rendendone possibile la diffusione su larghissima scala.

Oggi è più che mai attuale e Gimi la utilizza per realizzare parti di prodotto o prodotti interi come Perla. Nel caso degli stendibiancheria in resina Gimi ha ovviato alla cedevolezza delle parti di grandi dimensioni come il profilo della griglia o le gambe a cavalletto adottando una tecnologia innovativa: attraverso un soffio di azoto a bassissima temperatura (-20°C) durante la fase di iniezione si svuotano dall'interno le cavità chiuse rendendole eccezionalmente resistenti alla flessione e alla torsione.

Il marchio Nitrogen Technology rappresenta questo processo: la forza dell'azoto - raffigurato da un omino stilizzato - espande e sostiene la struttura che attraversa in modo definitivo.

## Technologie de pointe pour un usage quotidien.

La résine plastique est la matière première qui a révolutionné la production industrielle durant ces six dernières décennies, en réduisant le coût des objets à usage domestique et en permettant leur diffusion à très grande échelle.

Aujourd'hui, la résine est très tendance et Gimi l'utilise dans la fabrication de certaines parties de ses produits ou des produits entiers comme le séchoir «Perla». Dans le cas des séchoirs en résine, Gimi a résolu le problème de la taille des grandes pièces comme le profil de la grille ou les jambes repliables grâce à une technologie innovante: une injection d'azote à très basse température (-20°C) pendant la phase d'injection qui vide l'intérieur des cavités fermées, ce qui les rend exceptionnellement résistantes à la flexion et à la torsion.

Les produits ayant bénéficié de ce processus appelé Nitrogen Technology sont repérables par un logo représentant un petit homme stylisé. Ce petit homme symbolise la force de l'azote qui renforce la structure.

## Evolved technology for daily use.

Plastic resin is the raw material that has revolutionised industrial production of the last 60 years, lowering the production costs of items in everyday use and making it possible to distribute them on a large scale.

Today it is all the more topical because it can be recycled 100%. Gimi uses Nitrogen Technology to make product parts or entire products such as Perla. In the case of the resin clothes dryers, Gimi has removed the suppleness of the larger parts such as: the profile of the grid and the folding legs by adopting an innovative technology, which by blowing nitrogen at a very low temperature (-20°C) during the injection phase empties the closed cavities from the inside, making them exceptionally resistant to bending and twisting.

This process is identified by the brand name Nitrogen Technology: the strength of nitrogen - depicted by a stylised man - expands and supports the structure through which it passes.

## Tecnología evolucionada para el uso cotidiano.

La resina plástica es la materia prima que ha revolucionado la producción industrial de los últimos 60 años, reduciendo el costo de objetos de uso común y permitiendo su difusión a gran escala. Hoy, más actual que nunca, Gimi la utiliza para realizar partes de producto o productos completos, como Perla. En el caso de tendederos de resina, Gimi ha eliminado la maleabilidad de las partes de grandes dimensiones, como el perfil de la rejilla o las patas plegables, adoptando una tecnología innovadora, la cual a través del soplo de nitrógeno a muy baja temperatura (-20°C) durante la etapa de inyección vacía desde la parte interna las cavidades cerradas, convirtiéndolas en excepcionalmente resistentes tanto a la flexión como a la torsión.

La marca Nitrogen Technology representa este proceso: la fuerza del nitrógeno - representada por un hombrecito estilizado - expande y sostiene, en modo definitivo, la estructura que atraviesa.

## Neuentwickelte Technologie für den täglichen Gebrauch.

Kunstharz ist ein Rohstoff, der die Industrieproduktion in den letzten 60 Jahren revolutioniert und die Kosten so stark gesenkt hat, dass unzählig viele Gegenstände verbreitet und für den täglich Gebrauch unentbehrlich wurden.

Diese Technologie ist heutzutage umso aktueller und wird von Gimi zur Herstellung einiger Produktteile oder für Produkte wie Perla angewandt. Bei den Wäschetrocknern aus Harz, hat Gimi zudem das Problem der Nachgiebigkeit der großen Teile - wie im Falle des Gitterprofils oder der Kippständer - durch eine innovative Technik gelöst: Das Einspritzen von flüssigem Stickstoff bei sehr niedriger Temperatur (-20°C) während der Injektion, leert die geschlossenen Hohlräume von innen, so dass das Material äußerst biege- und torsionsfest wird.

Dieser Prozess ist unter dem Markennamen Nitrogen Technology bekannt: Die Kraft des Stickstoffs - durch das stilisierte Männlein dargestellt - erweitert und unterstützt die Struktur durch und durch endgültig.
