Suggestions for a correct use in order to reduce the environmental impact:

• Switch ON the hood at minimum speed when you start cooking and kept it running for few minutes after cooking is fi nished.

• Increase the speed only in case of large amount of smoke and vapour and use boost speed(s) only in extreme situations.

• Replace the charcoal filter(s) when necessary to maintain a good odour reduction effi ciency.

• Clean the grease filter(s) when necessary to maintain a good grease filter efficiency.

• Use the maximum diameter of the ducting system indicated in this manual to optimize effi ciency and minimize noise.
