study... affair in the region... lease its latent heat into the at... mosphere," said Koll. However, weather experts also suggest that since such ex... treme events do not occur in a... short span of time, forecasters have a bigger role to play. "Short-term forecasts are getting better and will continue to do so in the coming years. So, we can have better planning and management for protecting crops, for which so... lutions like agro-forestry, where trees would shelter crops and re... duce the water runoff and prevent soil erosion," Murtugudde said.

In addition, experts feel that the local administration in urban areas like Mumbai, Chennai and Bengaluru, which have, in recent years, experienced severe flood... ing caused due to extremely heavy rainfall over a short span of time, can make better use of these forecasts and improve management of transportation, schools, hospitals and storm drainage in such situations.

exchange accounts in... Provided deposits come from earnings remitted from abroad. IT exporters will also make business-related payments to Pakistan through these accounts. It is expected that... also announce... Cut in customs duty on smartphones

The finance minister announced that smartphones with Rs1,000 and above will now attract 5% customs duty. However, later it was announced that at the same time the duty on the lowest-end ("unbranded") phone has been increased from 11% to 16%. Customs duty of Rs650 on the lowest-end phone will be a bonanza for the smugglers! Smartphone is now the most used gateway to internet. Therefore, smartphones should be duty-free.

Information Budget brings Smartphone

PARVEZ IFTIKHAR ISLAMABAD

Pakistan's national budget for the financial year 2017-18 is being discussed and debated at all levels. The government appears to have given some attention to the information technology sector with facilitation steps, but at the same time some other measures run contrary to the interest of IT industry.

The promotion of the sector needs particular attention as the world pushes ahead with technological advancements to spur economic development and tackle emerging challenges like cyber security.

Such rainfall is going to be far more frequent in the upcoming years, says the study. Express

deficits and for the last three consecutive years, some parts of Karnataka and Maharashtra have remained dry. On the other hand, northwest is getting flooded far too often and this trend is seen extending to the Northeast. All this simply indicates that the pre-monsoon heat and humidity have increased and it has the most severe impact on farmers, preparing the land for the monsoon season.

not apply anymore, in which case it would mean an increase of 9%. Incidentally, till 2014 the same duties ranged from 0% to 5%, but were more than doubled soon after the spectrum auction of 2014.

If indeed it is a reduction, it would be a positive move because the operators like Zong, Telenor and Jazz are investing in deployment of 4G networks.

finds new... naking floods annual... heavy rains during June to September over India - this study has painted an altogether different picture. Researchers at IIT found that the Arabian Sea holds as high as 36 per cent moisture, followed by land evaporation contributing up to 29 per cent and, lastly, moisture pumped-in by the Bay of Bengal contributes is the lowest at 26 per. "Our findings indicate that land transpiration is also a major contributor to the Southwest monsoon and there is a need to consider it during the operational forecasts," said Subimal Ghosh, researcher at IIT-Bombay.

Unlike the Pacific or Atlantic Oceans, which vent out their excess heat over to either of the poles, researchers categorically highlight that the Arabian Sea has no such option available. "Since the warmer areas over the Arabian Sea have also been noted to be landlocked region, the sea here has little or no avenues to release its latent heat into the atmosphere," says Koll. However, also suggest extreme event short span of time have a bigger term forecast and will cover

location for IT park... amount of Rs6 billion has been allocated to set up an IT park in Amambad, which will receive funding from South Korea.

South Laptop Scheme... n amount of Rs20 billion has been allocated for PM's skill development laptop and youth programme. The fund is aimed at helping youth go digital. Perhaps instead of such populist initiatives, it is better to focus on prices of IT-PCs, routers, and other peripherals.

old rise in... it to warming of the... As part of this joint study, researchers, led by Roxy Mathew Koll from city-based Indian Institute of Tropical Meteorology (IITM), along with experts from IIT-Bombay and University of Maryland, have tracked this rising trend during 1950-2015 period, where widespread extreme heavy rainfall (150 mm or more) was observed over a span of over 5 lakh square kilometre area along central India.

Statistics from the national Disaster Database show that close to 70,000 people lost their lives and another crore people were rendered homeless in the 268 days of heavy rains, flash floods, torrential rains or landslides recorded over central India in the last six decades. The warming has been noted in the north of the Arabian Sea - the Indo-Pak region and parts of the northwestern coast of the gulf. "Due to excess heat, the monsoon should be disrupted. This will lead to lower rainfall in the west and more rain in the east."

Increase in duty on mobile phones... Customs duty of Rs250 on the import of mobile phones has been replaced with regulatory duty of Rs250.

It appears to be a similar story as of telecom equipment as some of the handsets were also being imported under FTA with China. The same regulatory duty has been de-

it in duty on telecom equipment... Customs duties on telecom equipment, which were 11% to 16%, have been replaced with a 9% regulatory duty. In a first glance, it appears to be a positive move, but it is not very clear if it is being implemented.
